Real Time Edits

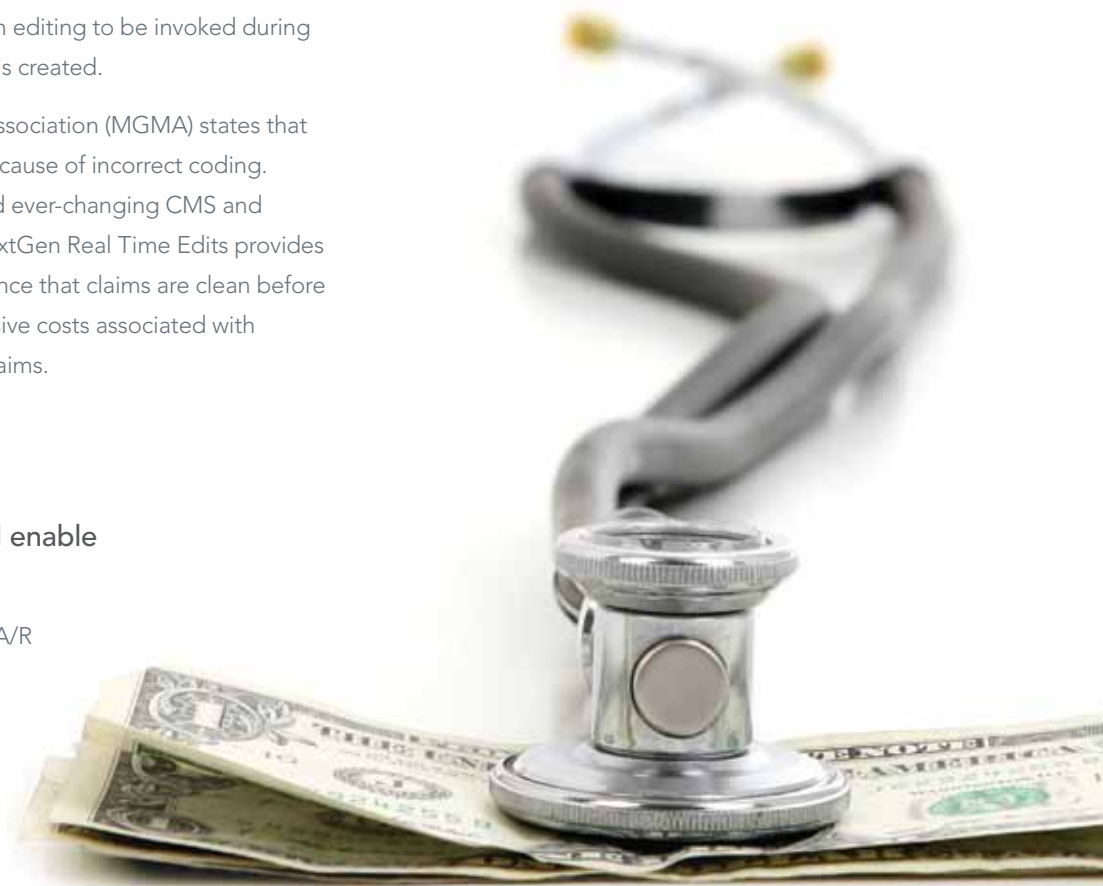

Expedite your Revenue Cycle with Real Time Edits

Does your practice spend costly resources tracking claims through adjudication and constantly working rejections? NextGen® Real Time Edits, integrated into NextGen® Practice Management, provides access to thousands of the most current commercial and Medicare payer rules, enabling claim editing to be invoked during the billing process before the claim is created.

The Medical Group Management Association (MGMA) states that over 15% of all claims are denied because of incorrect coding. With increasing healthcare costs and ever-changing CMS and commercial payer requirements, NextGen Real Time Edits provides the level of transparency and assurance that claims are clean before submitting, thereby reducing excessive costs associated with reworking and rebilling electronic claims.

NextGen Real Time Edits will enable your practice to:

- Reduce days of outstanding A/R
- Optimize reimbursement
- Improve staff productivity

NEXTGEN
HEALTHCARE

Key Benefits

- Reduce denials significantly by editing billing before the claim is submitted
- Stay in compliance with CMS and commercial payer guidelines
- Access the most current and applicable payer rules
- Improve practice efficiency by lowering the amount of time to rework and resubmit claims
- Improve overall revenue cycle

Key Features

- 1) **CONTENT RICH** – Access an extensive database of edit data and code sets
- 2) **DYNAMIC CONTENT** – Returned via Web calls from NextGen's edit engine. No release dependencies in receiving new edits
- 3) **AUTOMATED UPDATES** – CMS rules are automatically updated as they are published
- 4) **FLEXIBLE CONFIGURATION** – Apply edits to a payer at varied configuration levels
